

Interviewee: I think that there's just maybe a little bit too much of a focus on online writing just because—just as someone who's coming from a science background who was interested in writing, none of the online stuff is relevant. Learning different writing styles and being able to go to a professional and ask them to help you with this specific type of writing that you're interested in is more important to me than learning how to blog, or to look at an online portfolio, or something like that.
