This volume would not be possible without the generous support from the following to cover production expenses and gold open access:

The Weisell Foundation & The Finnish Maritime Archaeological Society

We are very grateful for their generosity in making this publication accessible to all, and providing us with the means to produce a high quality volume.

We are also extremely grateful to our copy-editor, Karenleigh Overmann, who has done an incredible work in fine-tuning all contributions. We would especially like to highlight her constructive feedback to our authors, valuable suggestions, insightful comments, careful editing, and above all, for the timely handling of the manuscript. We would also like to extend our gratitude to the editorial and production team at BAR, Jacqueline Senior and Tansy Branscombe, for their continuous support throughout the publication process.

Special thanks are owed to Pekka Tuuri for supplying the beautiful photograph for the cover. It was difficult to choose from the large selection of images made available to us by Pekka, but we think the photo of the House of Four Winds (Neljän Tuulen Tupa) in Hanko, taken in February 2021, perfectly encapsulates the contents of the book.

We thank the reviewers of papers found here, and of course, we are most grateful to our authors for going the extra mile to adhere to the ethos of the book. Your flexibility to adapt to our requests, to listen to our suggestions, and stick to our deadlines have made this a smooth journey towards publication. Thank you!

Last, but not least, Kristin Ilves and Veronica Walker Vadillo have worked under the auspices of “Survivors of Ragnarök – tracing Late Iron Age and early medieval maritime migrations in the Baltic Sea region” project funded by the Academy of Finland (Project number 332396), while Katerina Velentza was undertaking her tasks under the auspices of “Re-imagining the use of traditional watercraft in the Aegean Sea for a sustainable environment and economy” project funded by the Kone Foundation (Koneen Säätiö, grant number 202010870). We would like to extend our gratitude to both the Academy of Finland and the Kone Foundation for supporting our work in this volume.
