 early attitude toward research, 10, 59, 60
 attraction to pediatrics, 38
 Negro patients, 39–40
 informing patient or family of fatal illness, 49
 overdose of antibiotics and mutation of bacteria, 50
 women researchers at Rockefeller Institute, 83
 pathology in virus research, 88, 440
 low salaries for research workers, 125
 progress and new ideas in research, 146
 length of papers at conferences, 151–152
 science and the law, 187–188

- Rivers, T. M., Observations (*cont.*)
 interference in research, 198–199
 researchers as administrators, 205
 mistakes in research, 213, 303, 436
 liquor, 219–220, 295
 questioning in science, 259
 overlapping in science, 272
 winding path of research, 279
 John Enders' letter on Collaboration in Research, 299
 isolation wards in hospitals, 354
 laboratories in hospitals, 354–355
 psychiatry and psychoanalysis, 356
 retirement, 366–367
 limitations of publication in exchange of scientific ideas, 404
 group research, 424
 the bathroom's role in infection and immunization in poliomyelitis, 430–431
 human experimentation (on mentally-defective children, prisoners, scientists), 465–467
 opposition to passive immunization, 472–474
 ethics of placebos, 478
 interpretation in scientific discovery, 483
 family physicians and scientists, 484–485
 giving gamma globulin to family contacts, 485–487
 self-experimentation in science, 545
 meaning of research, 594–595
- Rivers, Thomas Milton, Publications
Epidemic Respiratory Diseases, 59
Filterable Viruses, 114, 115–119, 121, 123, 131, 397, 417, 438, 441
