

List of Figures

All figures © Gary M. Feinman and Linda M. Nicholas.

Figure 1.1. Map of Mexico’s Southern Highlands and the Valleys of Oaxaca and Ejutla.....	2
Figure 1.2. Shell from one small collection area on the east side of Ejutla de Crespo.....	2
Figure 1.3. Obsidian from the same collection area on the east side of Ejutla de Crespo.....	3
Figure 2.1. View of Ejutla de Crespo in the center of the Ejutla Valley	8
Figure 2.2. Map of Ejutla de Crespo and the extent of the archaeological site, the prehispanic mounds, and the area of dense surface shell	8
Figure 2.3. Prehispanic mounds with visible plaster floors in a house lot in the center of Ejutla de Crespo.....	9
Figure 2.4. Carved stone with crossed arms in the wall foundation of a house lot in Ejutla de Crespo.....	9
Figure 2.5. El Calvario on the top of a prehispanic mound just south of the area of dense surface shell	10
Figure 2.6. Fragments of shell and prehispanic pottery visible on the surface of a field at the eastern edge of Ejutla de Crespo.....	10
Figure 3.1. The area with surface shell extends east to the line of trees in the background.....	13
Figure 3.2. Map of the area with dense surface shell on the eastern edge of Ejutla de Crespo.....	14
Figure 3.3. Team members taking notes and collecting the surface of test unit 18n22e, located inside a modern house lot.....	16
Figure 3.4. Shell fragments and broken pottery visible in the south profile of test unit 18n22e.....	16
Figure 3.5. All the marine shell collected from level 5 of 18n22e.....	17
Figure 3.6. Map showing the areas excavated each year of the project.....	18
Figure 3.7. Crew members excavating and screening excavated deposits at Ejutla.....	19
Figure 3.8. Exposed midden in unit 18n24e with dense ceramics and shell debris.....	19
Figure 3.9. Ashy deposits and ceramics near the base of 18n24e.....	20
Figure 3.10. Partially exposed base of large pit in 18n24e and adjacent units	21
Figure 3.11. Dense layer of ceramics and stones in ashy deposits in 18n32e	21
Figure 3.12. Ash-filled pit in 14n36e	22
Figure 3.13. Roughly formed wall of stones in 8n32e.....	22
Figure 3.14. Small firepit in the area enclosed by the stone-lined drain and north wall of the prehispanic structure	23
Figure 3.15. Area of excavations at the beginning of the 1993 field season, showing modern house lot walls and structures.....	24
Figure 3.16. Team members excavating the prehispanic structure within the confines of the modern house lot.....	24

Figure 4.1. Map of the excavated features at Ejutla, showing the extent of the dense midden north of the residential structure and the location of all five pit kilns	26
Figure 4.2. Map of the excavated house and associated features	27
Figure 4.3. Crew excavating the prehispanic structure surrounded by outbuildings in the modern house lot.	28
Figure 4.4. The patio and north and east rooms of the prehispanic structure	28
Figure 4.5. The stone-lined drain in the northwest corner of the patio.....	29
Figure 4.6. The stone foundations of the eastern and southern walls of the east room	29
Figure 4.7. Offering of two carved ceramic vases outside the southeastern corner of the east room.....	29
Figure 4.8. The north wall of the residential complex	30
Figure 4.9. Top of the ceramic and stone pavement in the eastern part of the north room.....	30
Figure 4.10. Large sheets of mica in a small pit near the ceramic pavement in the north room of the structure	31
Figure 4.11. Broken <i>sahumador</i> (incense burner) and other trash on the north side of the residential complex	31
Figure 4.12. Drawing of the subfloor tomb on the north side of the patio.....	33
Figure 4.13. Cross sections and profiles of the stone walls of the tomb.....	33
Figure 4.14. The stone walls of the tomb exposed during the 1992 excavations	34
Figure 4.15. Stone marker in the patio wall and deposit of broken ceramics in front of the tomb entrance.....	34
Figure 4.16. The tomb threshold and large stone inside the tomb from the collapsed roof.....	35
Figure 4.17. Broken ceramic vessels in ash near the base of pit kiln 4	35
Figure 4.18. All of the ceramics from one 10 cm level in pit kiln 4.....	36
Figure 4.19. Drawing of pit kiln 4	36
Figure 4.20. Drawing of pit kiln 2	37
Figure 4.21. Drawing of pit kiln 1	37
Figure 4.22. Large broken ceramic vessels and ash on the floor of pit kiln 4	37
Figure 4.23. Ashy layer filled with broken ceramics in pit kiln 2.....	38
Figure 4.24. Pit kiln 4 completely excavated.....	38
Figure 4.25. Pit kiln 2 completely excavated.....	39
Figure 4.26. Drawing of pit kilns 3 and 5	39
Figure 4.27. Ceramics in lower level of pit kiln 5	40
Figure 4.28. Base of pit kiln 5.....	40
Figure 4.29. Profile and base of the southern part of pit kiln 3.....	41
Figure 4.30. Dense concentration of broken ceramics and ash in 18n32e that was cleaned out of pit kiln 3	41

Figure 4.31. Upper layer of broken pottery and cobble-sized stones in pit kiln 1	41
Figure 4.32. Lower level of burnt cobbles and charcoal-filled stoke pit of pit kiln 1.....	42
Figure 4.33. Pit kiln 1 completely excavated.....	42
Figure 4.34. Dense midden of broken pottery and shell above pit kiln 4.....	43
Figure 4.35. Dense midden of broken ceramic vessels above pit kiln 2.....	43
Figure 4.36. G-35 bowls with outleaned walls, some with tripod hollow supports	44
Figure 4.37. G-1 <i>molcajete</i> (grater bowl) rims and base fragments	47
Figure 4.38. Bat/jaguar claws from small vases, a fragment of a large spiked vessel, and a small monkey support.....	48
Figure 4.39. G-23 bowl rims and body fragments	48
Figure 4.40. Vessels with Teotihuacan-like decorated band and a large support with ‘coffee bean’ appliques.....	49
Figure 4.41. G-12 and G-21 bowl rims with parallel carved lines on interior.....	50
Figure 4.42. G-12 combed bottoms and possible Monte Albán Early I carved rims.....	50
Figure 4.43. Drawing of a café raked olla rim.....	50
Figure 4.44. Painted A-9 vessel fragments	51
Figure 4.45. Carved amarillo rims and body fragments	51
Figure 4.46. Imitation Fine Orange and Fine Gray rims.....	51
Figure 4.47. Classic period polychromes, showing interior and exterior surfaces	52
Figure 4.48. Vessel fragments with Talun-like carved scenes	52
Figure 4.49. Crema sherds with red paint and post-fire scratching	53
Figure 4.50. Postclassic polychromes, including interior and exterior of rim and snake support.....	53
Figure 4.51. Sample of female and warrior figurines from the Ejutla excavations	54
Figure 4.52. Effigy vessel headdress fragments with feathers, glyphs, and <i>mazorcas</i>	54
Figure 4.53. Effigy vessel limb fragments including feet, hands, and arms with bracelets.....	55
Figure 4.54. Effigy vessel torsos, bases, and miscellaneous pieces.....	55
Figure 4.55. Radiocarbon dates for each principal excavated context at Ejutla	56
Figure 4.56. Pair of carved vases: 2 J and 1 Tiger	57
Figure 5.1. The subfloor tomb at Ejutla, including a large stone from the collapsed roof and ceramic offerings.....	60
Figure 5.2. Drawing of tomb contents, showing four crania and four ceramic offerings.....	60
Figure 5.3. Ceramic offerings, including a small effigy vessel, and multiple human crania in the subfloor tomb.....	61
Figure 5.4. The last two interments in the tomb	61

Figure 5.5. Drawing of the flexed body of Individual 3 and a broken ceramic bowl.....	62
Figure 5.6. Drawing of Individual 2 with inset photo of small shell bead next to the pelvis.....	62
Figure 5.7. Drawing of the bones of Individual 1 and Individual 4 jumbled together at the head of the tomb.....	63
Figure 5.8. Piled bones of Individuals 1 and 4 and a small dog at the head of the tomb	63
Figure 5.9. Small effigy vessel with Cocijo imagery from the tomb.....	64
Figure 5.10. Three complete ceramic vessels from the tomb, all in gris paste: large shallow bowl or plate; small shallow outleaned-wall bowl, and outleaned-wall bowl.....	65
Figure 5.11. Simple pit burial of an adult female under midden north of the structure.....	66
Figure 5.12. Gris shallow outleaned bowls with flat bases.....	69
Figure 5.13. Gris hemispherical bowls	70
Figure 5.14. Gris cylindrical bowls and amarillo cylinders.....	71
Figure 5.15. Café shallow outleaned bowls.....	72
Figure 5.16. Small and miniature gris bowls	72
Figure 5.17. Large serving vessels.....	73
Figure 5.18. Large café basins, some with bolstered rims.....	74
Figure 5.19. Café jars including small seed jar and large coarse-paste café storage jars with handles.....	74
Figure 5.20. Charred gris and café jars	75
Figure 5.21. Large, fine-paste gris and amarillo jar rims, including jars for storing water	75
Figure 5.22. Small jars, many for storing seeds.....	76
Figure 5.23. Lids for covering large storage jars or cylinders	76
Figure 5.24. Café jars with appliques	76
Figure 5.25. Café comals, several of which could be partially refitted	77
Figure 5.26. Café sahumadors shaped like small frying pans.....	78
Figure 5.27. Café sahumadors and thick hollow handles	79
Figure 5.28. Large reconstructed café bowl with medallion applique on the rim	80
Figure 5.29. Sample of spindle whorls from Ejutla.....	81
Figure 5.30. Well-used obsidian blades	82
Figure 5.31. Obsidian points and perforators.....	82
Figure 5.32. Chert flakes and small retouched tools.....	82
Figure 5.33. Chert projectile points and perforator.....	83
Figure 5.34. Chert microdrills.....	83

Figure 5.35. Large basalt flakes and flake tools.....	84
Figure 5.36. Large basalt choppers and scrapers	84
Figure 5.37. Basalt axes and celts.....	85
Figure 5.38. Hammerstones and other large ground stone tools.....	86
Figure 5.39. Stone abraders	87
Figure 5.40. Metate in the tomb wall and other metate fragments	89
Figure 5.41. Large manos	90
Figure 5.42. Relevant abundance of the principal meat-bearing animals at Ejutla, Lambityeco, El Palmillo, and the Mitla Fortress	91
Figure 5.43. Percentage of comals in the ceramic assemblages at Ejutla, Lambityeco, El Palmillo, and the Mitla Fortress	91
Figure 5.44. Prehispanic domestic refuse and building stone fragments on the surface 30 m south of the excavated house at Ejutla.....	91
Figure 5.45. Map showing the projected distribution of prehispanic houses in the area with surface shell debris on the east side of Ejutla	92
Figure 7.1. Sample of figurine head and torso wasters	102
Figure 7.2. Poorly impressed and burnt figurines	103
Figure 7.3. Heavily eroded figurine fragments	104
Figure 7.4. Misshaped and warped ceramic wasters.....	105
Figure 7.5. Poorly finished vessel fragments	105
Figure 7.6. Spalled and exploded wasters.....	106
Figure 7.7. Ceramic wasters with large air bubbles and cracks.....	106
Figure 7.8. Vitrified and honeycombed wasters.....	107
Figure 7.9. Fired clay blocks and lumps	107
Figure 7.10. Pottery wasters with finger impressions	107
Figure 7.11. Fire-clouded bowl rim fragments	108
Figure 7.12. Café paste sherds with post-fire scratching	108
Figure 7.13. Ceramic <i>moldes</i>	108
Figure 7.14. Ceramic molds.....	109
Figure 7.15. Ceramic molds for making figurines and urn appliques, including feathers.....	109
Figure 7.16. Complete ceramic mold for a figurine head with braided headdress	110
Figure 7.17. Complete ceramic mold for a small figurine, with a matching figurine from Ejutla and a figurine that we made using the same mold	110

Figure 7.18. Modeled spherical and disk-like spindle whorls	111
Figure 7.19. Abraded spindle whorls	112
Figure 7.20. Spindle whorl wasters and unperforated, unfinished sherd disks.....	112
Figure 7.21. Figurines from other sites in the Ejutla Valley that were collected during the regional survey.....	113
Figure 7.22. Café medallions and molds	114
Figure 7.23. Amarillo cylinders with a depressed or applied band below the rim	114
Figure 7.24. Other unusual amarillo vessels at Ejutla have a band of small slanted ovals, broad panels of crosshatching, and other carved designs.....	115
Figure 7.25. Potsherds from one carved amarillo bowl that was found broken in situ	115
Figure 7.26. Spouted jars from Ejutla that are similar to ones on high-status residences at El Palmillo	116
Figure 7.27. Unusual and rare ceramic forms include sahumador rims and handles with animal effigies, brazier supports, an animal support, and a fine-paste ceramic object shaped like a phallus	116
Figure 7.28. Clay concretions and map of clay concretion distributions in the excavated area.....	118
Figure 7.29. Small modeled figurines	122
Figure 7.30. Finger impressions on the back of a warrior figurine head	123
Figure 7.31. Figurine torsos with remnant and complete back stands.....	123
Figure 7.32. Back stands that also serve as whistles.....	123
Figure 7.33. Small molded figurines, including a turtle shell.....	125
Figure 7.34. The most common female figurine variant at Ejutla, female #1 wearing a plain banded garment and triangular quechquémitl	126
Figure 7.35. Other plainly dressed variants of female figurine #1.....	127
Figure 7.36. Variants of female figurine #1 wearing a double-banded garment and quechquémitl, rounded quechquémitl, double strand necklace, and with arms crossed or resting on chest.....	128
Figure 7.37. Variants of female figurine #1 wearing a decorated garment and quechquémitl.....	129
Figure 7.38. Figurine heads wearing braided headdresses	130
Figure 7.39. Other braided headdress variants.....	131
Figure 7.40. Miscellaneous figurine heads and facial fragments.....	132
Figure 7.41. Warriors wearing plain loincloths.....	133
Figure 7.42. Warriors wearing decorated loincloths	134
Figure 7.43. Warriors wearing decorated garments	135
Figure 7.44. Priests wearing skirted garments, often holding a circular object on their abdomen, and priest wearing cape	136
Figure 7.45. Warriors wearing cotton armor.....	137

Figure 7.46. Warriors wearing a variety of helmets.....	138
Figure 7.47. Warriors wearing headgear with medallions and baubles	139
Figure 7.48. Warriors wearing hoods and feathered headdresses	140
Figure 8.1. All cut marine shell debris collected from level 3 in 16n26e and level 3 in 16n24e.....	143
Figure 8.2. Percentage of broad shell categories in the Ejutla assemblage	144
Figure 8.3. Small broken pieces of shell with no evidence of working.....	144
Figure 8.4. Graphs of broken shell and worked shell by major shell category.....	145
Figure 8.5. Large broken and cut pieces of shell include <i>Strombus</i> columellas, spires, and margins, and <i>Pinctada</i> margins and hinges	145
Figure 8.6. Cut and worked pieces from large gastropods.....	146
Figure 8.7. Shell fragments with surficial cut marks	146
Figure 8.8. Ornament failures include broken beads and unfinished shell placas	147
Figure 8.9. Shell ornament blanks for beads and pendants.....	148
Figure 8.10. Broken and worked fragments of <i>Pinctada mazatlanica</i>	151
Figure 8.11. <i>Chama</i> shells.....	152
Figure 8.12. <i>Spondylus</i> shells.....	152
Figure 8.13. Other bivalve species, <i>Anadara</i> and <i>Glycymeris</i>	153
Figure 8.14. Unfinished ornaments and fragments of <i>Patella mexicana</i>	153
Figure 8.15. Small gastropods, including marginellas, olive shells, and turret shells, cowrie shells, and small limpets	154
Figure 8.16. Graph of principal genera used to make shell ornaments.....	156
Figure 8.17. Finished and unfinished <i>Pinctada</i> placas	158
Figure 8.18. Placas, mostly triangular, cut from gastropods.....	159
Figure 8.19. Abraded <i>Pinctada</i> disks	159
Figure 8.20. Abraded gastropod disks.....	160
Figure 8.21. Shell disks cut with a hollow tubular drill.....	160
Figure 8.22. Shell disk beads	160
Figure 8.23. Small shell beads at Ejutla are mostly cylindrical or spherical; several in bottom two rows are unfinished	161
Figure 8.24. Tubular shell beads	161
Figure 8.25. Whole shell beads and pendants.....	162
Figure 8.26. Formed shell pendants.....	163

Figure 8.27. Two carved shell ornaments, a monkey pendant and a representation of a flower	163
Figure 8.28. Bracelets of <i>Patella</i> and <i>Pinctada</i>	164
Figure 8.29. Pectoral cut from a large <i>Patella mexicana</i> shell	164
Figure 8.30. Comparison of principal shell genera at Monte Albán and Ejutla by percentage	172
Figure 8.31. Sample of <i>Pinctada</i> placas from Monte Albán.....	172
Figure 8.32. Nacreous beads and pendants from Monte Albán	173
Figure 8.33. <i>Spondylus</i> placas from Monte Albán.....	177
Figure 8.34. <i>Pinctada</i> disks and tabular beads from Monte Albán.....	177
Figure 8.35. Whole shell beads and pendants at Monte Albán, small olive and marginella shells and <i>Oliva porphyria</i>	177
Figure 8.36. Ternary chart showing proportions of ornaments, worked shell, and broken shell at Ejutla, the shell-working area on the west side of the North Platform, and all other contexts at Monte Albán	179
Figure 8.37. Map of Monte Albán, showing location of the Main Plaza, areas where shell and indications of shell working were found during the surface survey of the site, and the excavated shell-working area on the west side of the North Platform.....	180
Figure 8.38. Map of Mesoamerican obsidian sources and sites with sourced obsidian	181
Figure 8.39. Map of highland Oaxaca showing sites with sourced obsidian and the three principal routes into the valley from the north, east, and south.....	182
Figure 8.40. Map of Oaxaca showing high-traffic routes, including route to Monte Albán from the Pacific Coast that passes through Ejutla	184
Figure 8.41. Map of colonial route from the Pacific Coast to Central Mexico that passes through Miahuatlán, Ejutla, and the center of the Valley of Oaxaca.....	185
Figure 8.42. A mica mine in Ejutla	186
Figure 9.1. Cylindrical drill plugs cut from onyx, limestone, and other unidentified stone.	190
Figure 9.2. Drawings of stone drill plugs and shell disks cut with hollow tubular drills	191
Figure 9.3. Onyx plaques, including possible broken ornament, and other onyx cut pieces.....	192
Figure 9.4. Small lapidary objects include beads, obsidian nose plugs, a spindle whorl, and a buccal whistle.....	192
Figure 9.5. Small carved stone head in profile.....	192
Figure 9.6. Carved stone with bird imagery found just outside the eastern wall of the structure	193
Figure 9.7. Thick sheets of mica from a cache in the north room of the structure	194
Figure 9.8. Bone tools include needles, awls, shuttle, and fire-hardened antler tip.....	195
Figure 9.9. Bone ornaments include perforated dog incisor, bone ring, bone plaque, and polished bone fragments. Rest of bone, including human long bone, has cut marks and other evidence of working.....	197
Figure 9.10. Cut and worked turtle shells	197

Figure 9.11. Heavily used small pieces of obsidian.....	199
Figure 9.12. Sources of gray translucent chert near Ejutla at Huertas and Monte del Toro	200
Figure 9.13. Chert production debris from making microdrills.....	201
Figure 9.14. Repurposed ceramic sherds used as abraders.....	201
Figure 9.15. Stones with grooved lines.....	202
Figure 9.16. Stone platforms for working shell and lapidary and ceramic sherds with drill impressions.....	202
Figure A4.1. Small modeled animal figurines	247
Figure A4.2. Miniature anthropomorphic figurines	248
Figure A4.3. Female #1 with braided headdresses and simple garments	249
Figure A4.4. Female #2 heads with intricate headdresses	250
Figure A4.5. Female #2 torsos with decorated garments.....	251
Figure A4.6. Female #3 small figurines with crossed arms	252
Figure A4.7. Male figurines. Warriors wearing cotton armor, feathered capes, loincloths, plain jackets	253
Figure A4.8. Male figurines. Possible priests and warriors with trophy heads. Warriors wearing helmets, feathered hoods, and tiered hoods.....	254
Figure A4.9. Small whistles	255
Figure A4.10. Large globular whistles.....	256

List of Tables

Table 1.1. Chronological sequence for the Valley of Oaxaca	5
Table 4.1. Size of patios and residences at excavated Classic period sites in the Valley of Oaxaca	32
Table 4.2. Subterranean tombs at four Classic period sites excavated by Feinman and Nicholas	34
Table 4.3. Select temporally diagnostic ceramic varieties from the Ejutla excavations.....	45
Table 5.1. All ceramics at Ejutla by paste for each general context	67
Table 5.2. Vessel forms at Ejutla by paste.....	68
Table 5.3. Ceramic forms by paste for sample of rims with measured diameters	68
Table 5.4. The stone assemblage at Ejutla	81
Table 5.5. Principal stone tools at Ejutla.....	88
Table 5.6. The Ejutla faunal assemblage.....	90
Table 5.7. Percentage of the most important meat-bearing animals in the faunal assemblages at four Classic period sites in the Valley of Oaxaca.....	91
Table 7.1. Figurine wasters in the ceramic assemblage at Ejutla.....	102
Table 7.2. Other ceramic wasters by general form and paste	104
Table 7.3. Firing and production errors observed in the ceramic assemblage at Ejutla.....	104
Table 7.4. Abraded and modeled spindle whorls at Ejutla (excavation and survey), Lambityeco, El Palmillo, and the Mitla Fortress	112
Table 7.5. Ceramic production indicators at Ejutla, Lambityeco, El Palmillo, and the Mitla Fortress	117
Table 7.6. Spindle whorls of different sizes at Ejutla (excavation and survey), Lambityeco, El Palmillo, and the Mitla Fortress	117
Table 7.7. Percentage of the four principal ceramic wares in the assemblages at sites excavated by Feinman and Nicholas.....	119
Table 7.8. Principal contents of the Ejutla pit kilns	120
Table 7.9. The Ejutla figurine assemblage	124
Table 8.1. The shell assemblage at Ejutla by class	142
Table 8.2. Shell species at Ejutla.....	148
Table 8.3. Quantity of each shell genus identified at Ejutla.....	149
Table 8.4. Shell ornaments by genus at Ejutla	155
Table 8.5. Types of shell ornaments at Ejutla by class.....	156
Table 8.6. The shell assemblage at Monte Albán by class.....	169
