

INDEX OF TERMS

- Acute** 29
Affricate 24
Analytic transcription 43, compressed 44
Anti-resonance (zero) 17
Assonance 42
Attenuation 35
Attributes 13
Audibility 38
Auto-correlation 23
Back 30
Bi-lingual speech 12
Bi-polar 10
Border mark 14
Bracketing 45
Center of area 4
Centralized 36
Ceteris paribus 1
Checked 23
Chromaticity 32, 46
Close 27
Co-existing phonemic systems 11
Colored hearing 32
Common denominator 7
Commutation 1
Compact 27, 58-59
Complementary distribution 6
Completeness 15
Configurational feature 14
Conjugate distinctions 10
Consecutive stages: articulatory, acoustical, aural, perceptual 12
Consonant 19
Consonant harmony 42
Consonantal 19, 46
Constrictive 21
Contextual variants 5
Continuant 21
Contradictories 29
Contraries 29
Decoding 12
Dentals 30: sibilant (hissing) and non-sibilant 24
Dichotomous scale 9
Diffuse 27, 58-59
Dimensions 13
Discreteness 11, 45
Distinction: minimal, duple 2
Distinctive feature 3, 14
Distinctiveness 9
Distribution 12
Emphasis 15
Emphatic softening 35
Emptiness 14
Envelope: smooth and rough 21
Expressive feature 15
Extraction of redundancies 11, 45
Flap 21
Flat 31
Formant region: central 27, non-central 27, 29
Formants: first 27, 30, **second** 30, **upper** 27, 30
Front 30
Glide 19
Glottal catch 19, 23
Glottalized 23
Grading gamut 15
Grave 29
Identification 12
Implementation 7
Implication 41
Information 9
Inherent 13
Intermittent 19
Interrupted (discontinuous) 21
Invariance 4
Labials 30: labio-dental and bilabial 24
Lateral 19
Lax 36, 57-61
Liquid 19
Long 14, 59
Loudness 13
Mean proportional 10
Meaningful entity 1
Mellow 23
Modulation 13
Morpheme 14
Muffling 25
Murmured vowels 26
Mutilation 42

Nasal (nasalized) 39
 Nasal murmur 39
 Network analysis 16
 Neutral position 18
 Noise 25
 Non-compact 29
 Non-consonantal 19
 Non-diffuse 29
 Non-uniqueness 7
 Non-vocalic 18
 One-to-one correspondence (isomorphism) 5, 7
 Open 27
 Operational autonomy 42
 Opposition 3
 Optimal distinction 10, 46
 Oral (non-nasalized) 40
 Overlapping 5
 Palatalized 31
 Palatals 27, 30: sibilant (hushing) and non-sibilant 24
 Pharyngealized (emphatic) 31, 34
 Phase 24
 Phoneme 3
 Phoneme boundaries 18
 Phonemic pattern 4
 Phonemic proportion 1, 10
 Phonemic (broad) transcription VI
 Phonetic power 28
 Phonetic (narrow) transcription VI
 Pitch 13
 Plain 31
 Polarity 11
 Poles 17
 Predictability 12
 Prominence 13
 Prosodic 13
 Received Pronunciation (RP) V
 Receiver (decoder) 8
 Redundancy 8, 15
 Resonance 26
 Retroflex 34
 Rounded 31
 Running frequency analysis 16
 Semantic load 14
 Sender (encoder) 8
 Sequence 3
 Sharp 31
 Short 14
 Significant unit 1
 Source 16
 Speech wave 16
 Spiritus: asper and lenis 39
 Square pattern 33, 34
 Stop 21
 Stratification 41
 Stress 13
 Stricture 27
 Strident 23
 Strident lateral 26
 Strident (sibilant) trill 25
 Strong: position and phoneme (fortis) 5, 36
 Superposition 3
 Suprasegmental 4
 Switching code 11
 Syllabicity 13
 Symbolism 28, 32
 Tempo 14
 Tense 36, 57-61
 Threshold of perceptibility 11
 Tonality 29
 Transfer function 16
 Transient effects 17
 Triangular pattern 33, 34
 Trill 21
 Two-choice (binary) selection 2, 9
 Unchecked 23
 Variables 13
 Velars 27, 30: uvular and velar proper 24
 Vocal tract 16
 Vocalic 18, 46
 Voiced (buzz) 26
 Voiceless (hiss) 26
 Vowel 19
 Vowel harmony 41
 Weak: position and phoneme (lenis) 5, 36
 Zero phoneme 39
