

# Subject Index

- 
- Abstract entities and their names, 9, 59, 108–114, 122, 142–143, 262
- Actions and their names, 65, 89, 108–110, 191, 199
- Adjectives, 9, 107, 118, 203–204
- Artifacts and their names,  
adults' understanding of, 160–163, 189  
children's understanding of, 163–167  
essentialism and, 162–163, 189
- Asperger's syndrome, 79, 87. *See also* Autism
- Associations and associationism, 1, 6, 56–60, 79
- Autism, 78–81, 125–126
- Basic-level categories and their names, 82, 90, 148, 264
- Chimpanzees, 3, 84–86, 242
- Collections and their names, 110–114, 199–200
- Color words, 7, 26–27
- Concepts  
basic-level, 148  
definitional theory of, 18  
and essences, 151–154, 167–169  
exemplar theory of, 19, 150  
functions of, 145–148  
and generalization, 147–148  
and meanings, 17–22  
and properties, 150–151  
prototype theory of, 18–19, 150  
subordinate, 148  
superordinate, 148  
theory-theory of, 151, 168–169
- Connectionism. *See* Word learning, connectionist models of
- Constraints on word meaning, 10–11, 19, 264–265  
mutual-exclusivity bias, 10, 12, 66. *See also* Lexical contrast  
noun-category linkage, 10  
principle of categorical scope, 10  
principle of contrast, 10, 67–68. *See also* Lexical contrast  
principle of conventionality, 10, 68. *See also* Lexical contrast  
principle of extendibility, 10  
principle of novel name-nameless category, 10. *See also* Lexical contrast  
principle of object scope, 10  
principle of reference, 10  
shape bias, 10–12, 154–160, 246. *See also* Shape  
taxonomic bias, 10  
whole-object bias, 10, 12, 91–93, 98–108. *See also* Objects
- Determiners, 22, 115–117, 191
- Early talkers, 48
- Essentialism, 151–154, 167–169  
for artifacts, 161–163  
definitions of, 152–154  
for natural kinds, 162–163  
origins of, 153–154
- Fast mapping, 26–35, 59  
mechanisms of, 32–33  
scope of, 27–37
- Feedback, 1, 8
- Gaze following, 46, 62–64, 79
- Holes and their names, 108

- Identity  
 of abstract individuals, 142–143  
 and kind membership, 137–143  
 and spatio-temporal continuity, 138–143
- Idioms, 16–17
- Individual differences, 25, 35, 51–53  
 in adult vocabulary size, 50–51, 192  
 in rate of word learning, 48–50  
 in style of word learning, 50
- Individuals  
 benefits of reasoning about, 134–136  
 and number, 99–100, 135  
 perceptual vs. conceptual, 136  
 and proper names, 126, 130–131, 137–143  
 relationship to kinds, 135–143  
 social cognition and, 136  
 that are not objects, 108–114, 122, 142–143, 199–200  
 and tracking, 135–136
- Induction, problems of, 3–4, 11–12, 18, 82–84, 86, 105
- Language, its effect on thought  
 different proposals about, 241–244  
 in forming new concepts, 250–254  
 through inner speech, 248–249  
 in numerical cognition, 233–238, 250  
 in social reasoning, 248–250  
 across speakers of different languages, 237, 244–248
- Language, living without, 254–259  
 “Language of thought,” 241
- Late talkers, 48
- Learning, skepticism about, 12–15
- Lexical contrast, 65–73, 106  
 development of, 65–67, 71–72  
 evidence for, 65–67  
 function of, 72–74  
 and learning of number words, 217  
 and learning of pronouns, 124, 133  
 and learning of proper names, 124, 128–130, 133  
 and learning of verbs, 66  
 origins of, 67–70
- Literacy, 13, 42, 192
- Meanings. *See also* Concepts  
 definitions of, 17–22  
 skepticism about, 17
- Moral notions and their names, 262–263
- Naming explosion. *See* Word spurt
- Natural kinds and their names, 162–166
- Numbers, 100, 213  
 animals’ understanding of, 214  
 babies’ understanding of, 214–215, 233, 235–236  
 cross-linguistic differences in the understanding of, 237  
 effect of language in the understanding of, 233–238, 250  
 evolutionary origins of the understanding of, 233–238
- Number words  
 and counting, 215–216, 233, 236–239  
 counting-principles theory of learning of, 219–220, 233  
 cross-linguistic differences in the acquisition of, 231  
 developing understanding of, 215–218, 238–239  
 empiricist theory of learning of, 218–219  
 learned as context-dependent words, 220–221  
 learning the precise meanings of, 232–233  
 linguistic cues in the acquisition of, 221–232  
 problems children face when learning, 215–216
- Objects  
 and abstract individuals, 108–114  
 definitions of, 93–97  
 developing understanding of, 94–97  
 enumeration of, 100  
 and parts, 93, 109  
 salience of, 98–100  
 simple versus complex, 101–105, 120  
 specialness of names for, 91–93, 209–211  
 tracking of, 139–141
- Overextensions, 36–38, 66, 158–159
- Parental speech to children, 8, 12–13, 45, 48–49, 82–84, 106, 118–119, 215, 262
- Parts and their names, 82, 89, 106, 109–110, 112, 119
- Pictures and their names. *See* Visual representations
- Polysemy, 16, 253, 263
- Poverty-of-stimulus, 9

- Prepositions, 9, 22, 29, 204–205
- Pronouns  
 and autistic children, 125–126  
 and blind children, 126  
 emergence of, 115–116, 119, 121–122, 134, 115–116  
 lexical contrast and the learning of, 124  
 referential cues to the learning of, 123–124, 134  
 referential properties of, 121–122  
 syntactic cues to the learning of, 122–123  
 and theory of mind, 124–126
- Proper names  
 emergence of, 89, 115–116, 118–119, 135  
 lexical contrast and the learning of, 128–130  
 referential cues to the learning of, 131–132, 134  
 referential properties of, 126, 167  
 syntactic cues to the learning of, 127–128  
 types of entities named by, 127–128
- Saussurian signs, 16–17, 74–78
- Shape  
 of artifacts, 160–161, 164–166, 189  
 importance of, 154–160  
 of visual representations, 175, 182–186, 189
- Sign languages, 4, 45, 125
- Sounds and their names, 100, 110, 199
- Spelke-objects, 93–97. *See also* Objects
- Subordinate categories and their names, 66, 82, 148
- Substances and their names, 100–107, 195, 198–201
- Superordinate categories and their names, 66, 82, 108, 148
- Syntactic cues to word learning, 10, 45, 47, 53, 107–108  
 for adjectives, 203–204  
 for collective nouns, 199–200  
 evidence of, 195–197  
 importance of, 197–198, 208–212  
 learning of, 205–208  
 limitations of, 208–212  
 for names of actions, 199  
 for names of sounds, 199  
 for non-solid substance names, 195, 198–199  
 for number words. *See* Number words  
 for object names, 195, 197–198  
 for prepositions, 204–205  
 for pronouns, 122–123  
 for proper names, 127–128  
 for solid-substance names, 195, 200–201  
 for verbs, 201–203, 209–211
- Theory of mind, 10, 55, 60–87, 261  
 and adult's speech to children, 82–84  
 in chimpanzees, 85–86  
 as an explanation for lexical contrast, 67–72  
 impairments of, 78–81  
 limitations of, 86–87  
 in normal communication, 92  
 in object-name learning, 60–65  
 in pronoun learning, 124–126  
 in proper name learning, 131  
 in understanding the nature of words, 74–78  
 in verb learning, 65
- Underextensions, 36–38
- Verbs, 7, 9, 66, 89, 115–117, 201–203, 209–211
- Visual representations, 9, 159  
 adult's understanding of, 173–178  
 babies' understanding of, 178  
 children's naming of, 182–190  
 children's understanding of, 178–182  
 and "real things," 171–172  
 ubiquity of, 171–172
- Vocabulary size, 5–6, 25, 50–51, 192
- Williams syndrome, 81
- Word learning,  
 age differences in, 12–13, 36–47  
 associationist theories of, 56–60  
 in blind children, 7–8, 59  
 compared with fact learning, 25–26, 29–35, 67–70  
 compared with other types of language learning, 2, 9  
 connectionist models of, 40, 57–58, 60  
 across cultures, 8, 59, 89, 118–119, 262  
 in deaf children, 7  
 errors in, 36–37  
 "hedgehog" vs. "fox" theories of, 263–265  
 impressiveness of, 1–3, 6, 10, 25–26

Word learning (cont.)

individual differences in. *See* Individual differences

in non-human primates, 3, 84–86

from non-syntactic context, 191–194

Words

definitions of, 15–17

“extensions” of, 18

first, 35–39, 89, 91–93

“intensions” of, 18

meanings of, 17–22. *See also* Concepts

as Saussurian signs, 16–17, 74–78

Word spurt, 35–36, 39–43
