Series Foreword

We are pleased to present this monograph as the twenty-sixth in the series *Linguistic Inquiry Monographs*. These monographs will present new and original research beyond the scope of the article, and we hope they will benefit our field by bringing to it perspectives that will stimulate further research and insight.

Originally published in limited edition, the *Linguistic Inquiry Monograph* series is now available on a much wider scale. This change is due to the great interest engendered by the series and the needs of a growing readership. The editors wish to thank the readers for their support and welcome suggestions about future directions the series might take.
